Solicitation number 19CV1020Q0003

The U.S. Embassy in Praia, Cabo Verde (Department of State) is seeking to obtain satellite internet service. Cost should incorporate the onsite installation and ongoing maintenance of the VSAT.

Specifically, we are seeking the following requirements:

- pay-as-you-go option
- 24/7 connection via satellite with fixed dish
- Fixed IP address for VPN configuration
- Support for 40-50 workstations online at a time
- Annual usage – approximately 3 to 5 days as a backup and for monthly testing

We currently do not have an existing VSAT system on site and would like to have an on-demand access to satellite internet service to provide backup for the embassy main fiber circuit contracted to a local provider. The service will be tested monthly but will be used only if the main circuit goes down.

If interested, please send your proposal or inquiries to PraiaProcurement@state.gov referencing solicitation number 19CV1020Q0003.

Proposals are due by March 16th, 2020
